-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

Response to Arguments

1. Applicant's arguments filed 28 October 2005 have been fully considered but they are not persuasive. Applicant argues lack of serious burden, since the case involves multiple inventions, a serious burden ensues due to the myriad issue involving 35 USC, 101,102,103 and 112 and the extra search burden and examination requirements too numerous to list. That there is an argued overlap is not material since many invention by different parties/entities also overlap and thus, additional cost are warranted due to their extra invention.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, and 31-45 drawn to switching control circuit classified in class 363, subclass 16.
- II. Claims drawn to 21-30, classified in class imaging system, subclass 327/434.

The inventions are distinct, each from the other because of the following reasons:

Invention Group I and Group II are related as combination and sub combination.

Invention in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the sub combination as claimed for

Art Unit: 2838

patentability that the subcombination has utility by itself or other combinations (MEP 806.05(c)). In instant case, the combination as claimed does not require the particulars of the subcombination as claimed because one apparatus and other is operating method. The subcombination has separate utility such as computer control.
